

VACCINATION AND BLOOD TEST PROTOCOL

Requirements for boarding.

Dear Doctor,

We are a boarding facility exclusively for felines. We offer private facilities for each of our guests. We also give the owners the opportunity to allow their cats to engage in Cage-Free Playtime/Activities during the day. In each case we have different vaccination and blood test requirements. Please help us support our clients and their cats by confirming that these blood tests have been completed.

All cats boarding/staying with us must have a current FVRCP vaccine (or titer test).

FVRCP vaccine (or titer test)

Cage-Free Playtime/Activities:

Cats involved in Cage-Free Playtime/Activities are required to have a negative blood test for FeLV and FIV within the past 12 months. In order to protect the cats that have been entrusted to our care we need to make sure the cats they are interacting with are healthy. We realize that many cats are not vaccinated for FIV because of the sarcoma risk. We require the FIV test, NOT THE VACCINE.

FeLV

FIV

Flea Free Facility:

We maintain a flea-free facility, all cats are required to have properly maintained flea protection prior to their arrival. Please provide flea protection for your pets.

Please attach a copy of current paperwork for these tests with your facility name, address and telephone number. Or you can email us directly at kittykittyhotel@gmail.com.

Thank You!
